

COLLEGE OF PUBLIC HEALTH

UNIVERSITY OF SOUTH FLORIDA - 2006/2007 UNDERGRADUATE CATALOG

As we enter the new millennium, public health looms large at the forefront of the world's concerns. Population pressures, environmental problems, maternal and child health care, disaster management, new emerging diseases, behavioral challenges, health care management and cost containment demand solutions from the public health professional.

To meet these challenges, the mission of the College of Public Health is to promote public health through research, education and services. The USF College of Public Health is one of only 37 public health colleges in the nation and is fully accredited by the Council on Education for Public Health.

Undergraduate students who are seeking a career in public health can select to major in a broad range of Bachelor degree programs including engineering, business, social sciences, biological sciences, nursing, social work, pre-medicine, other allied health specialties or interdisciplinary degrees in order to be prepared for graduate work in the College. Pre-medical students seeking admission to medical school may want to consider completing a Master's degree in public health prior to application or admission to medical schools or as an alternative to clinical degrees. Undergraduate students may consider the Undergraduate Accelerated Entry Program for Master's degree in Public Health Education that bypasses the Bachelor's for the Master's degree.

A Fast Track for Honor BMS, ISS and INS students is available. Students in this track may select programs within one of the College's five departments: Community and Family Health, or Epidemiology and Biostatistics, or Environmental and Occupational Health, or Health Policy and Management, or Global Health. A college-wide area of study includes Public Health Practice (PHP). PHP requires a minimum of 3 years of health-related work experience.

The course of study and field experiences are designed to prepare health professionals with skills to develop, implement, manage and evaluate programs that focus on health, behavioral, legal, medical and economic factors. Public health is also concerned with finding cost-effective ways to keep health care costs down while assuring quality. Career opportunities are available in a variety of work settings including hospitals and ambulatory care facilities, managed care organizations, voluntary health agencies, public and private school systems, colleges and universities, local, federal and state health agencies, private industry and international health organizations.

The undergraduate program in the College has cultivated into a vibrant program with over 2000 students enrolled in our courses each semester. Based on the enrollment figures and students expressing their interest in declaring a minor in public health, a General Public Health Minor (GPHM) was developed and approved by the USF Undergraduate Council. Each department in the College, Community & Family Health, Environmental & Occupational Health, Epidemiology & Biostatistics, Health Policy & Management, and Global Health fully support this initiative and currently offer, or are in the process of developing, undergraduate courses that will apply to the GPHM.

The purpose of the undergraduate curriculum offered in the College is to engage students in student centered learning so they are able to articulate the role of public health in disease prevention and health promotion locally, statewide, nationally, and globally. In addition, students will study the core concepts in public health, core competencies for all public health workers, core public health competencies related to essential public health practice and public health issues. Moreover, students will be able to analyze public health issues related to a particular concentration area, become knowledgeable about dynamic career paths in public health and develop an understanding of public health that serves as a foundation for the pursuit of graduate public health degrees.

Undergraduate students seeking careers in public health are invited to refer to the College website <http://publichealth.usf.edu>, or contact the College advisor: advisor@hsc.usf.edu to request the *College of Public Health Career Guide*. Students may

review the broad range of public health professions and also plan an undergraduate program that will meet the college's admission requirements for graduate work. Introduction to Public Health and Survey of Disease (or their equivalent) are prerequisites for several concentrations prior to graduate study in public health. Below is a list of undergraduate courses. College courses are offered through traditional classroom methods, on-line courses and programs, weekend programs, learning institutes, certificates and continuing education courses.

The College offers undergraduate courses to prepare students for the graduate criteria required for admission. USF undergraduate courses HSA 4120 "Introduction to Public Health" and HSC 4554 "Survey of Human Disease" (or their equivalent) are prerequisites for several concentrations prior to graduate study in public health.

- HSC 2133 Sex, Health, and Decision Making, is offered each semester. This course provides the student with an overview of the issues involving sexual behaviors, decision-making processes and health outcomes.
- PHC 4542 Stress, Health and College Life addresses the relationship between stress, as a multi-causal concept, health and disease and the recognition and prevention of an unhealthy level of stress;
- HSC 4933 Special Topics in Public Health, targets public health concerns and issues.

Current Special Topics undergraduate courses include:

- Behavioral Health System Delivery
- Consumerism and Health
- Human Structure and Function
- Introduction to Environmental Health
- Introduction to Food Safety
- Introduction to Maternal and Child Health
- Introduction to Tropical Public Health Immunology
- Issues in Severe Mental Illness
- Laboratory Methods Analysis
- Law and Protecting the Public Health
- Medical Terminology
- Men's Health and Gender in Society
- Prevention of Mental Illness
- Severe Mental Illness, Stigma, and Community Integration

Master's degrees include the Master of Public Health (MPH), which is a professional, non-thesis degree; the Master of Health Administration (MHA); the Master of Science of Public Health (MSPH), a research thesis degree; as well as the doctoral (PhD) degree.

Undergraduate Accelerated Entry Program for Master's Degree in Public Health Education

The Department of Community and Family Health, in the College of Public Health offers an accelerated entry program that enables qualified undergraduate students to enter the Master of Public Health (MPH) degree program with a concentration in Public Health. Applicants must have attained a grade point average of at least a 3.0 on a four-point scale, or received a minimum score of 1000 (combined verbal/quantitative) on the GRE. This special MPH program permits students to earn an MPH without first completing the baccalaureate. Applicants must have completed 90 undergraduate semester hours in a program related to the field of public health such as social sciences, natural sciences, behavioral sciences, pre-medicine, pre-dental, nursing, or education. Interested students are encouraged to consult the Department of Community and Family Health advisor upon completing 60 undergraduate semester hours. Interested students are encouraged to inquire: Dr. Robert McDermott, (813) 974-6700; email: rmcdermo@hsc.usf.edu; or Magdalene Argiry, (813) 974-6505; email: advisor@hsc.usf.edu.

General Public Health Minor

The goal of the General Public Health Minor is to develop in a broad range of students an understanding and appreciation of the field of Public Health. The overall objectives for students are as follows:

Upon completion of the General Public Health Minor coursework student will be able to:

1. Articulate the role of public health in disease prevention and health promotion locally, statewide, nationally, and globally.
2. Describe core public health concepts and issues.
3. Discuss and analyze public health issues related to a particular concentration area.
4. Describe career path ways in public health.
5. Develop an understanding of public health that serves as a foundation for the pursuit of graduate public health degrees.

The General Public Health Minor consists of 18 credit hours. It is recommended that students follow the sequence of enrolling in courses as documented below. This sequence is designed to initially give students a broad overview of the concepts of public health. Elective courses are then selected in consultation with the undergraduate academic advisor from a wide range of courses offered by respective departments. Students will be encouraged to select elective courses that provide a cohesive learning experience based on their individual interests and goals.

Required Courses (9 semester hours):

HSA 4120 Introduction to Public Health	3
HSC 4554 Survey of Human Disease	3
HSC 2100 Contemporary Health Science	3
or	
HSC 4933 Special Topics in Public Health*	3
Total	9

The remaining 9 credit hours can be taken from the following list:

HSC 2133 Sex, Health and Decision Making	3
HSC 4542 Stress Health and College Life	3
HSC 4933 Special Topics in Public Health**	3
Total	9

*Please see academic advisor for required special topics courses.

**Please see academic advisor for selected special topics courses.

Selected special topics courses can include subjects:

Behavioral Health System Delivery	3
Consumerism and Health	3
Health Care Marketplace	3
Human Structure and Function	3
Introduction to Environmental Health	3
Introduction to Maternal and Child Health	3
Introduction to Tropical Public Health Immunology	3
Issues in Severe Mental Illness	3
Laboratory Methods Analysis	3
Law and Protecting the Public Health	3
Medical Terminology	3
Men's Health and Gender in Society	3
Prevention of Mental Illness	3

Other special topics subjects may be offered depending upon student demand and instructor availability.

NOTE: Courses taken for a major cannot be used again to satisfy requirements of a minor.

For more information, contact:

Dr. Kay Perrin, Director of Academic Affairs, (813) 974-6704; kperrin@hsc.usf.edu

Dr. Suzanne Perry-Casler, Director of Undergraduate Education, (813) 974-9598; sperryca@hsc.usf.edu

Fast Track for Honors BMS, ISS and INS Students

Undergraduate students in Honors programs will be eligible to apply for admission to selected graduate degree programs in public health during their senior year. This fast track format will allow eligible seniors to complete up to 20 graduate credits in public health which will count toward the Bachelor's degree as well as a Master of Public Health (MPH) or Master of Science in Public Health (MSPH). These graduate degrees vary from 39-44 credits (excluding field experience).

Application for the Honors ISS and INS Students

Application deadline for these programs is July 1 for guaranteed consideration. Applications will be accepted during the junior year. A minimum score of 1000 on the combined Q and V of the GRE, good standing in Honors program, senior status, and 2 letters of recommendation from undergraduate faculty are required. For further information: <http://publichealth.usf.edu/fasttrack.html>

Certificate Programs

Students who have completed their bachelor's degree may register for certificates in Disaster Management, Health Management and Leadership, Infection Control, Social Marketing, Safety Management, Violence and Injury: Prevention and Intervention, Clinical Epidemiology, and Interdisciplinary Women's Health Public Health Policies and Programs.

The GRE is not required for Certificate programs. However, Certificates may have other specific requirements. Refer to the College of Public Health website: for flyers describing certificate programs.

Contact the USF Office of Graduate Certificates, (813) 974-2442 www.outreach.usf.edu/gradcerts for application forms.

Public Health Advising

Potential applicants should prepare at the undergraduate level for careers in public health. Undergraduate public health courses present a broad range of public health issues and are offered on campus and on-line. These undergraduate courses can be selected as part of the student's approved planned program or as electives to prepare students for graduate classes. Except for the undergraduate student selecting the Accelerated Health Education program or the Fast Track for Honors program, all applicants should have completed or be in their last semester of completing the Bachelor's degree prior to applying to this College. All departments accept the MCAT score in lieu of the GRE for admission. The GMAT may be submitted for the Department of Health Policy and Management. Advisors in the College assist undergraduate students with career planning and selecting undergraduate coursework. For specific information, request a College of Public Health Catalog and Career Guide followed by an appointment with the College advisor.

Advising Office: The College of Public Health is located facing Bruce B. Downs Boulevard at the Northwest corner of the USF Campus near the Fletcher Avenue intersection. Advising office is in the College of Public Health (CPH) Room 1150.

Call toll free 1-888-USF-COPH or locally (813) 974-6505 for the Public Health Career Guide, a copy of the upcoming Schedule of Classes which can also be found on the web at: publichealth.usf.edu/academicaffairs/

Non-Degree Registration: Students who have completed the Bachelor's degree may register for up to 12 hours as "non-degree" students while in the process of preparing to apply to the College. Consult publichealth.usf.edu/nondegree.html the College's Director of Student Services, (813) 974-6505 for options, course selection and enrollment process.

Address: 13201 Bruce B. Down Blvd, Tampa, FL 33612-3805; Mailpoint - MDC 56

Office Hours: 8am-5pm, Monday through Friday. Walk-ins are welcome but an appointment is recommended.
